CAREER SUMMARY

BCA graduate with hands-on AI and Web Development internship experience in data analysis, machine learning, and full-stack application development. Proficient in Python, Java, and JavaScript, with proven ability to design and deploy real-world Android and web applications, including a Firebase-based smart transit system. Strong problem-solving, teamwork, and up-skilling record in enterprise data center technologies.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, HTML, CSS

Databases: MySQL, Oracle Database

Frameworks/Platforms: Android Studio, Flask, Firebase, Google Maps SDK

Tools: VS Code, Jupyter Notebook, Git/GitHub, Excel, Canva

Concepts: Machine Learning Basics, REST APIs, DOM Manipulation

FINAL YEAR PROJECT

Bus Mithra – Smart Bus Ticketing and Live Tracking System

Android (Java), Python Flask, Firebase Realtime Database, Google Maps SDK, ZXing

- Built two connected Android apps – a Passenger App and a Conductor App – addressing manual, error-prone ticketing and lack of real-time bus visibility in Indian public transport.
- Enabled passengers to register with gender-based profiling, search buses by source/destination, view fare and schedule details, book tickets, pay via UPI/Card/Cash, and receive QR-based digital tickets.
- Implemented an automatic gender-based pricing model granting free passes to female passengers without manual intervention.
- Built live bus tracking on Google Maps using FusedLocationProviderClient to broadcast conductor GPS location to Firebase in real time.
- Developed conductor-side QR ticket scanning and verification with instant valid/invalid feedback, live trip statistics, and secured the system with Firebase Authentication and security rules preventing ticket fraud through one-time QR usage.

INTERSHIPS

Web Development Intern – Scout and Guide Trust Jan 2026 – Mar 2026

- Completed a 2-month internship in Web Development, gaining hands-on experience building and deploying web applications.

AI Intern – Rubix Feb 2026 – Mar 2026

- Built a data parsing system for structured CSV datasets using Python and developed rule-based and ML categorization models, generating insights through automated visualizations.
- Recognized for reliability and dedication in delivering assigned in-house project tasks on time.

PROJECTS

Movie & TV Show Explorer – Solo Project

- Built a dynamic movie and TV show search/discovery web application using HTML, CSS, and JavaScript with public API integration. Implemented search, genre/rating filters, and detailed title information; focused on responsive UI design, DOM manipulation, and asynchronous API calls for real-time results.

Automated Attendance System – Android App

- Created a face-recognition based attendance system with an offline database for reliable use without constant connectivity.

Data Analysis & Visualization Dashboard – Solo Project

- Built an interactive data analysis project using Python (Pandas, Matplotlib, Seaborn) to explore and visualize structured datasets, automating summary statistics, correlation heatmaps, and trend charts.

EDUCATION

Bachelor of Computer Applications (BCA) – SSMRV College, Bengaluru 2026

- CGPA: 8.83 | First Class Exemplary | Distinction in all semesters | Team Everest Scholarship

Pre-University Course (PUC) – Loyola Composite PU College 2023 | 93%

CERTIFICATIONS & ACHIEVEMENTS

- Advance Diploma in Enterprise Technology & Data Center Architecture – Abstream Technologies
- Storage Architecture & Enterprise Networking – Abstream Technologies
- Introduction to Data Center & Cloud Technology and Server Architecture & SAN Networking – Abstream Technologies
- Python for Data Science – NIIT Foundation, Jan 2026
- Certificate Course in Web Designing – NIIT Foundation, Dec 2025
- Certificate Course in Active Basic IT (98 hrs, Good) – NIIT Foundation, Nov 2024
- Basic IT, Web Designing & Python for Data Science – NIIT Foundation
- Job Readiness Skills for Girls – Team Everest, supported by Oracle
- Python Intermediate – DataCamp
- 3rd Prize – Datathon 2026 "From Data to Action", Akshara Foundation & ACSEL Technology Forum – Rs. 20,000 cash prize
- 3rd Prize – PwC Community Day Hackathon (VIDYA, Nov 2025) | NSS Volunteer (2 Years)

LANGUAGES

English | Kannada | Hindi (Basics)
